## Geotrust True BusinessID EV Multi 5+

This multiple site certificate issued from the True BusinessID EV range will enable to secure several SSL sites with a single certificate.

This certificate can secure 5 sites names in its standard version and can go up-to 250 via addition of SANs.

This Extended Validation certificate triggers the green URL bar on most browsers and is UCC compatible.

### GeoTrust

Geotrust has been created in 1999 and is now part of the DigiCert group as well as Thawte and Symantec Website Security.

Geotrust supplies good quality and affordable certificates which makes it a major certification authority.

### trust booster

TBS INTERNET was founded in 1996 by IT security specialists to help companies comply with encryption best practices. Customers include leading companies, value-added resellers and public sectors.

Since the early days, TBS INTERNET offered a highly professional service issuing as well as installing digital certificates for its clients. As Internet usage grew and companies began to require specialized online security, it was the first to create a multi-brand digital certificate platform, securing platinum partnerships with major SSL providers.

Thanks to it's own certification authority "TBS X509" the company can provide competitive authenticated certificates very well supported in browsers.

### Equipment
Any kind of server
Any kind of browser
